Ufology:
From Outer Space to Planet Earth

Over the last 50 years, hundreds and thousands of Unidentified Flying Objects (UFOs) have been documented, and UFO sightings are estimated to be in the millions. Yet the UFO phenomenon has been a topic which world governments have just started shifting from total denial towards cautious acceptance. Since the new millennium, we see a trend of disclosing government secret files on UFO investigation--in Mexico, France and the UK for instances.

For a long time, ground-breaking findings from UFO investigation skip the attention of many scientists. Sometimes, they were not even regarded as a legitimate subject of scientific concern. However, the new millennium sees a new tendency of rereading these cases in many established institutions around the world. Is it time for human reconciliation with extraterrestrials? Let's join the Hong Kong Institute of Ufology and find out more.

Six sessions on Tuesdays from September 16 to November 4 (except October 7 & 14) in English, supplemented with Cantonese.

半世紀下來，目擊UFO案每年仍以萬計遞增——也只是九成多從未匯報個案的冰山一角！

踏入新世紀，從全盤否認到謹慎承認，各國政府陸續打開外星現象的太平門：04年墨西哥政府廣播空軍紅外線UFO群片段、07年法國太空總署公佈五十年來上萬UFO紀錄、08年英國國防部網頁刊登「從不存在」機密UFO檔……相比往日控告美國政府才取得幾頁「冇料到」UFO檔，當今全球政府紛紛自我大披露，似乎人類正在走向與外星現象妥協的一個轉捩點？

課程共分為六節，以英語輔以粵語主講。
